WORKING PAPER

Central Intelligence Agency
National Foreign Assessment Center
Office of Imagery Analysis

ECONOMIC RESOURCES DIVISION

Significant Substantive Items, Week of 5 November 1979

1. [] attended the Inter-Agency Working Group meeting on Soviet Civil Defense to review the NIO version of [] Inputs to pertinent conclusions based on imagery analysis [] and the results of our evaluation of unit manning are to be incorporated in the estimate. Additional meetings have been scheduled for next week to complete the review. []

2. [] responded to a request from OER to determine the validity of a recent Soviet claim that a new long distance coal slurry pipeline in western Siberia was operational. []

[]
passed to OER and the area will be monitored as additional imagery becomes available. []

3. [] of ORD visited ERD to discuss imagery analyst tools of the future -- the post 1985 soft copy light table and accessories. Don has been working with NPIC/IEG and discovered their lack of interest in economic targets. He came to us for information concerning the needs of imagery analysts responsible for economic target searches and an orientation as to office functions. Don requested an office point of contact and has been referred to []
